DETAILED ACTION

REJECTIONS WITHDRAWN

1. There are no rejections withdrawn.

REJECTIONS REPEATED

2. All of the 103 and obviousness-type double patenting rejections set forth in the non-final rejection of 3/2/07, pages 2-11 are repeated for the reasons of record. Applicant has added the limitation "said dispersion comprising a water miscible organic solvent" to independent claims 1 and 7. However, the limitation is new matter as set forth below.

NEW REJECTIONS

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 1-7 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The newly added limitation "said dispersion comprising a water miscible organic

solvent” is new matter because the original disclosure does not provide support for the limitation.

ANSWERS TO APPLICANT’S ARGUMENTS

5. Applicant’s arguments of 6/1/07 have been carefully considered but are deemed unpersuasive. Applicant has argued that Anderle does not disclose and actually teaches away from the newly added limitation “said dispersion comprising a water miscible organic solvent”. However, the limitation is new matter as set forth in the 112 rejection above.

Applicant has argued that it is the use of a diol chain extender which achieves the resistance to moisture degradation. While this may or may not be true, applicant’s claims do not exclude the inclusion of chain extenders due to the term “comprising” and therefore one of ordinary skill in the art would be motivated to combine the teachings of Anderle and Pechhold in order to provide moisture resistance and also eliminates the use of carcinogenic amines.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is

filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
